ATLAS SHRUGGED

Outages, outages, outages...

In the last few days, we have experienced major tech outages at heavily regulated industries, from the airlines to the banks. Whether they are blowback from a cyberattack initiated by a country we're bombing overseas or poor technical updates by an entity that has no incentive to serve its customers, one thing is clear. Government has infused itself into every aspect of our lives, and we are feeling the pain of that burden.

Join the Libertarian Party today, and let's push back against the suffocating government behemoth.
