 <b>ENGINEERS</b> <b>AUSTRALIA</b>	PRACTICE NOTE NO: #		Version: #	Month	Year
	Copyright © EA and EHA 202#				
	Buildings and structures	Museum artefact	Operating object	Material specific	Intangible heritage
	<b>Title of Practice Note</b>				

## 1. Introduction and background

In the header identify which area the Practice Note relates to by grey filling the Text Box

Buildings and structures	Museum artefact	Operating object	Material specific	Intangible heritage
--------------------------	-----------------	------------------	-------------------	---------------------

Provide a suggested “*Title of Practice Note*” a brief introduction explaining the context, background, and relevance of the topic. Include historical, technical, or legislative context as appropriate. Keep this section succinct to maintain readability.

(Note: The remainder of the Header box including the PRACTICE NOTE NO: #; the Version: #. the date (Month and Year) and the date of the Copyright © EA and EHA 202# will be completed by the EHA Heritage Engineering Committee following final review approval.)

## 2. Purpose

Clearly state the purpose of the Practice Note, including what it aims to achieve or communicate. For example:

- To provide practical design principles for...
- To assist engineers in identifying appropriate materials for...
- To support informed decision-making in heritage adaptive reuse projects.

## 3. Scope and applicability

Identify the scope and applicability of the Practice note:

- What types of projects or conditions is it relevant to?
- Who should use it (e.g., engineers, architects, project managers)?
- Are there limitations or exclusions?

## 4. Content and Guidance

Present the technical content in a clear, concise, and structured format:

- Use headings, bullet points, or diagrams to aid clarity.

And where appropriate, include:

- Design principles
- Inspection guidelines
- Material compatibility advice
- Assessment methodologies
- Link to or cross-reference relevant industry guidelines, codes of practice, conservation charters, or engineering standards.
- Keep this section focused and readable (typically 2 - 4 pages maximum).
