JOCO CRUISE 6, DAY 3

AT SEA-TUES, FEB 23, 2016

Ahoy!

Welcome to Day Three of our Expedition, and the First Day out of Sight of Land. These cerulean waters were once plied by fleets of privateers and Dutch Fluyts, challenging the Supremacy of the Spanish Crown. The Age of Sail may be past (Alas!) but we have plenty to keep us busy. Check out the schedule below, or track down John Roderick. He seems knowledgeable.

ASK SCARFACE

Dear Scarface,

I've had issues connecting to the Twit-arr and using my CruiseMonkey app. What's going on?

Sincerely,

Disconnected in Cabin 5556

Dear Disconnected,

As Cerberus the hellhound has three heads, so too does your question have three answers.

The main answer though (head 1) is this: the CruiseMonkey app had a switch designed to flip at noon upon embarkation day and refresh the app's cache with new onboard data. Rather than flipping once, this switch forgets itself and flips on and back off multiple times a second, hitting the Twit-Arr/CruiseMonkey servers with a flood of unmanageable traffic. Even with a new DNS name (pending but Soon™), this is why we ask you delete the CruiseMonkey app - to save the network from this glut of requests.

Once the new DNS name is live you will be able to access the web version of Twit-Arrr and CruiseMonkey at joco.rccl.com and joco.rccl.com/cm, respectively. Until then, the old DNS name (jcc6.rccl.com) will still work.

The other answers (heads 2 and 3) have been omitted for space reasons.

Na Zdarovie,

Scarface
