Caryn Ann,

Law enforcement agencies are tracking you using Automated License Plate Readers. They are also harvesting your Bluetooth, WiFi, and RFID signals using platforms such as Leonardo/ELSAG SignalTrace.

These systems allow authorities to track all of our movements without individualized suspicion, probable cause, judicial oversight, or warrants.

As a [resolution from the Libertarian National Committee](#) points out: "this dragnet surveillance systematically treats every citizen as a potential suspect, normalizes mass monitoring, and unjustly shifts the burden of defending constitutional rights onto individuals while state legislatures move to codify surveillance secrecy."

Democrat and Republican politicians support these activities. Only the Libertarian Party opposes them. Specifically...

- [The LNC has issued a resolution condemning these invasions of your privacy.](#)
- The Libertarian Party of Arizona has successfully resisted these intrusions through public testimony, coalition building, public records requests, and the development of alternative legislation.

[If you like our stance on this, but you are not yet a dues-paying member of the Libertarian Party, please join today. >>>](#)

[If you are already a member, please contribute so we can reach more people with this important work. >>>](#)

PS: Please share this with anyone you know who is concerned about this issue.

Help us push back against mass surveillance!
