THINK LOCAL, ACT LOCAL

Federal elections are the shiny, new object every election cycle

While congressional and presidential elections can have a disparate impact on things like our bank accounts and engagement in foreign conflict, it is local elections and local government where our homes, families, friends, and our basic rights - from property rights to gun rights - are most dramatically affected.

This week, we look at three different ways local government can harm us and how we can push back. Our writers explore local elections, eminent domain, and ballot board shenanigans; how much we can be hurt by local tyrants; and, how much we can push back.

Join the only party that fights for your rights at every level of government.
