

# LASSY®

**HAND TAPPER**  
MODEL 12F  
Capacity from #0 to 1"

## Engineered for speed, accuracy and reduced tap breakage.

- A heavy-duty tapper designed for a wide range of tapping and threading applications.
- Engineered spindle design assures true tap alignment, quick tool change and positive drive. Hollow spindle is hardened, precision ground and closely fitted to bronze bushings.
- Spindle balance protects taps and assures first-class threads.
- Heavy-duty, ribbed, cast arm maintains true spindle alignment giving right angle close fit, tapped holes.
- Direct reading depth gage shows exact depth of tap in work. Saves time by permitting tapping to specified depth and not beyond.
- Holding bars lock in place to prevent work-piece twisting.
- Aluminum hand wheel is strong yet light for sensitive tap "feel".
- Adapter plate is available for mounting arm to a drill press table.
- Quick change tap adapters, racks, round adjustable die adapters, riser block and welded steel stand make this the most versatile, all-purpose tapper available.

**Complete Unit**
